

Star Warning Systems®

STAR-PAK® RP966 & RP996 Six Head Remote Strobe Power Supply

Visual System Diagnostics (VSD™)

In the unlikely event that your system fails to operate properly, the Visual System Diagnostics (VSD™) helps diagnose the problem. By observing the Status Star™ located on the power supply you can evaluate four important operations of the strobe system:

1. The low voltage (input voltage)
2. The high voltage (output voltage)
3. The trigger lines (power going to strobe heads)
4. The strobe heads enabled
